Awards a Geopace **Certificate of Competency**

These sessions are only open to delegates who have completed the Geopace **Introduction to Phlebotomy (GPT003)** course.

- ◆ Half-day or evening sessions (2-3 hours)
- ◆ Supervised live blood sessions on a 1-to-1 basis
- ◆ Small groups and limited places (max. 6 per session)
- ◆ Unlimited extra practice on artificial arms
- ◆ Gain valuable experience with live blood draws
- ◆ Awards a Geopace Certificate of Competency

Your session overview ...

You will start the session with a recap and further unlimited practice on the artificial arms, carefully following a **Competency Checklist** under the supervision of your Live Bloods tutor. Your tutor will ensure you fully understand the checklist before you are teamed up with a partner and take blood samples from each other. This is strictly on a 1-to-1 basis and both you and your session partner will have signed a disclaimer to have blood taken. The number of "live blood draws" that you take will ultimately depend of the time available but you should have ample opportunity to take multiple draws. At the end of the session, on completion, you will be awarded a competency pass. Your **Geopace Certificate of Competency** will be posted to you within 7-10 days.
